

### **Fees for Winery Process Water**

(a)(3)(A) For dischargers covered under Statewide General WDRs for discharges of winery process water, the annual fees shall be based on the following schedule:

| <b>Facility Process Water Flow (gal/yr)</b> | <b>Fee</b> |
|---|------------|
| 10,000 to 30,000                            | \$750      |
| >30,000 to 100,000                          | \$1,000    |
| >100,000 to 300,000                         | \$1,200    |
| >300,000 to 600,000                         | \$2,000    |
| >600,000 to 1 million                       | \$3,000    |
| >1 million to 3 million                     | \$7,000    |
| >3 million to 7 million                     | \$13,000   |
| >7 million to 15 million                    | \$19,000   |

(B) Dischargers enrolled in an approved Local Agency Oversight program will receive a 50 percent fee reduction.

(C) Dischargers enrolled in an approved sustainability program will receive a 10 percent fee reduction.

(D) Dischargers enrolled in an approved Local Agency Oversight program and an approved sustainability program will receive a 50 percent reduction of the annual fee that results from the application of a 10 percent fee reduction.

(E) Dischargers with facility process water flows of less than 10,000 gallons per year that are directed by the state board or a regional board to enroll under the Statewide General WDRs for discharges of winery process water shall pay the fee applicable to dischargers with 10,000 to 30,000 gallons per year.

(F) Dischargers with facility process water flows of 10,000 to 30,000 gallons per year that are directed by the state board or a regional board to enroll as a Tier 2 facility under the Statewide General WDRs for discharges of winery process water shall pay the fee applicable to dischargers with >30,000 to 100,000 gallons per year.
